Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: "for sake of conveniently illustration" (page 1), "this text search model is capably provided user" (page 2), "after further to click the symbol going to be clicked" (Abstract). Similar language found renders the claims and drawings objectable.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The unclear, inexact language used in the claims and specification, such as "removing cursor to certain row" (Claim 1), fail to enable one skilled in the art to make and/or use the invention. As a result, the Examiner has subjected the claims to the broadest reasonable interpretation.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 5 recite the limitations "removing cursor", "click said row" (Claim 1), and "going to be clicked" (Claim 5), in part (b) of each claim. There is insufficient antecedent basis for this limitation in the claim.

As a result, dependent claims have also been rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-6, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Bayless et al (US Patent 5,754,636), hereinafter Bayless.

Regarding claims 1 and 5, Bayless teaches rows of symbols on a display screen used to facilitate a query, and the user selection of such icons through mouse clicks (taught as the use of directory icons to open various stored directories, at col. 18, lines 1-7), displaying words of the same initial on the display screen (taught as the display of "b" elements, shown in Figs. 80-81 and at col. 43, lines 59-67), and displaying related information on the screen (taught as the display of "b" elements and their relevant phone numbers and type of number, in Figs. 80-81).

Regarding claims 2, 4, 6 and 8, it can be seen in Fig. 80 that the symbol used for a query is a letter, in this case "b". Bayless teaches text or word searches in Fig. 78, and col. 43, lines 21-31.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bayless.

While Bayless fails to explicitly teach the use of "a symbol for pronunciation", ASCII characters for varying languages and accents are well-known in the art, and have long been included in many text-entry and word processing programs, for example, Microsoft Word. Therefore, it would have been obvious to one of ordinary skill in the art, to include accents and accented letters in the available alphabet of Bayless.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Roswell whose telephone number is (703) 305-5914. The examiner can normally be reached on 8:30 - 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca can be reached on (703) 308-3116. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
